

Message

Dear Participant,

This message is to inform you of some recent enhancements to managing the payment of your orders. We offer several convenient ways to pay for your orders including Electronic Check or Credit/Debit Card. You can [Manage Payment Accounts](#) under the "My Profile" link.

Use [Manage Payment Accounts](#) to add, edit or delete payment accounts (including registering for Electronic Check Processing). You can also update the expiration date on your credit/debit card. A default payment account is used for the current order charge and any outstanding balance. We recommend setting a Default payment account which will let us know how you want to pay for your orders through Mail Service.

When you [add a new payment account](#), we will ask you if you would like the payment account to be available for family members or dependents on the account. This feature allows you to share this payment account with all your family members. If you do not want other family members to use your payment account for their orders, you can select "NO", and this account will be limited to your use only. Your payment account information is always kept confidential.
